

#### CITY OF HUNTINGTON BEACH PUBLIC WORKS COMMISSION INFORMATION ITEM

Item No. PWC 07-025

SUBMITTED TO:

Chairman Siersema and Members of the Commission

SUBMITTED BY:

Travis K. Hopkins, PE, Acting Director of Public Works

Engineering

DATE:

October 17, 2007

SUBJECT:

Orange County Flood Control District Projects Update

Please find attached the County's "Proposed 7-Year Flood Control Projects Plan."

### Huntington Beach Channel – D01 and Talbert Channel – D02:

Improvements to both of these channels are functionally complete with minor cathodic protection and spoils removal remaining.

#### E.G.G. – Wintersburg Channel – C05:

The City has recently reviewed and returned 65% drawings to the County for improvements to this channel. The project extends from the City Limit to Warner Avenue. The portion along the Shea project (City Limit to Graham Street) is currently excluded from the project, as those improvements are a condition of Shea's development project, which is currently under review by the Coastal Commission.

Additionally, the County recently met with City staff to review a plan to install temporary sheet piles in the channel berm along Shea's property as an interim flood protection project in anticipation of the upcoming rainy season.

Lastly, the County is finalizing an emergency flood protection plan to be implemented in the event that the berm along Shea's property is breached, prior to completion of the interim sheet pile project.

#### **Planned Projects:**

The remaining projects on the list are in design or are planned for future years.
